### Mission

PAC 3 provides guidance and recommendations for response to nuclear and radiological incidents of both an accidental and deliberate nature. The major elements of reports under the oversight of PAC 3 include:

- identify important steps to be taken in the interdiction of, preparedness for, and effective responses to possible acts of nuclear and radiological terrorism;
- define performance requirements, instrumentation, and testing criteria for security surveillance systems;
- develop operational strategies and optimization procedures for early, intermediate, and late-phase responses to a radiological incident or nuclear incident; and
- recommend effective methods for protecting against, mitigating, and treating traumatic injuries and long-term health and psychological effects of radiation exposure.
